Who is Noah ???

Who is Noah

Hi i am Noah Akkad. I was born in Vancouver British Columbia last year i moved to Toronto to study animation and ux ui design currently I am studying at Seneca college while also applying to study animation in the winter

What is my design identity?

Noah is adaptable resilient and creative ux ui designer / animator / student. I adapt to the challenges that are presented to me whether it's an assignment or work project or animation. Challenges are a part of every job no matter what field you work in and resilient Is something important for the never–ending challenges that arise during projects.

Everything i listed above is great but without being creative you can't really do anything and i think one of the most important parts of designing is the brainstorming done beforehand As that sets up the process of the project for success
